

Main features

- The inclinable configuration from 0° to 90° allows the machine to be quickly adapted to different product characteristics, improving handling in both vertical and horizontal positions.
- Inclination adjustment via a practical handwheel enables fast configuration changes, reducing setup times and facilitating operator work.
- The packaging system creates a bag sealed on the front, back, and central section, ensuring a stable and neat closure of the product.
- Operation via foot pedal or dual push-button control provides greater convenience and safety during packaging operations.
- The machine is suitable for packaging a wide range of products, including fruit and vegetables, bread, pastries, fresh products, dairy products, cured meats, and small non-food items.
- The adjustable forming tunnel allows easy handling of different product formats and sizes, increasing production flexibility.
- The possibility of using film rolls up to 680 mm allows packaging of products of various dimensions with a single machine.
- Motorized film pulling and sealing wheels ensure smooth film movement and continuous packaging operation.
- All product-contact parts are made of stainless steel, ensuring cleanliness, durability, and long-term reliability.
- The display interface with step-by-step guided settings simplifies machine operation and speeds up adjustments.
- The machine uses ISO-certified components, the same as those used in standard DM Pack solutions, ensuring build quality and operational continuity.
- The possibility of inline integration with loading systems or other automatic solutions allows optimization of production flow and improves overall plant efficiency.

Technical features

Model	ZED
Sealing bar width:	400 mm
Maximum bag width:	150 mm
Film width:	Max. 680 mm
Reel diameter:	300 mm
Electric supply:	380-400V 50/60Hz 3PH+N+earth
Power:	2 kw
Air:	6 bar constant
Standard colours:	RAL 5018
Working height:	900+/-50 mm
Weight:	270 kg

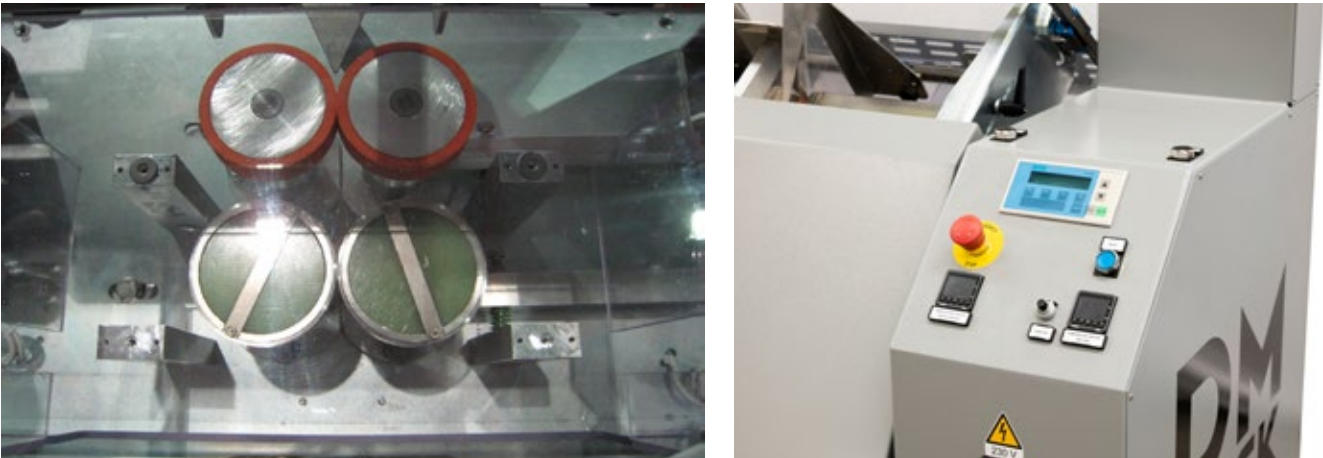

Top film reel position

Tilting table from 0° to 90°

Sealing wheels and operator panel

ZED
Inclinable packaging machine

ZED

The ZED inclinable semi-automatic packaging machine by DM Pack is a versatile solution designed for packaging single or multiple products in bags made from flat polypropylene film. Thanks to its adjustable vertical or horizontal configuration, the machine easily adapts to different product types, ensuring practical and effective packaging even for delicate or irregular items.

Manual loading allows simple and flexible production management, while the sealing system ensures bags are uniformly sealed on the front, back, and central areas. Its compact structure, ease of use, and ability to be integrated inline with other packaging systems make it a reliable solution for companies seeking production continuity, operational simplicity, and good packaging efficiency.

All the surfaces in contact with the product are in stainless steel, as standard. Version available completely in stainless steel.

Small and versatile. Easy to adjust. Manual function with button/pedal or automatic using product reading. Siemens keypad.

Tilting surface from 0° to 90° or vertical.

Reel in high position and easily replaced for fast format change.

Adjustable forming for film opening or fixed forming tube.

Can be used in the food and non-food sector.
